

Statistics Exercise - doing a Survey

In this project you are going to do a survey. That is you are going to

- ask people questions about something that you want to know
- put the results in a spreadsheet.
- analyze the data
- make a report

Part 1

1. What do you want to find out?
2. What question or questions are you going to ask people?
3. How many people are you going to survey?
4. How did you choose the people you surveyed?
5. How will you record your answers?

Part 2

1. Make a new spreadsheet.
2. Put your data into the spreadsheet.
3. Make a pivot table of your data.
4. Make a column chart using the pivot table

My Report

Answer these questions on a new worksheet in your spreadsheet.

1. I wanted to find out
2. I surveyed _____ people.
3. I choose people who _____.
4. Do you think that people gave you a truthful answer to your questions?
5. Why do you think that?
6. How did you record your data?
7. How will you display your results?
8. What did you learn when you analyzed the data?
9. What could you have done to make the survey better?
